Coptic SCRIPtorluM

May 14, 2013 Workshop

Caroline T. Schroeder
Amir Zeldes

Research Objectives

Online, open source digital platform:

- For Corpus linguistics in Coptic
- Searchable text for historical and literary research
- Visualizations of Coptic texts and manuscripts
- Interoperable with current XML standards
- Collaborations with and contributions from other scholars

Sahidic Corpus Research: Internet Platform for Interdisciplinary multilayer Methods

Coptic Scriptorium is...

A corpus of Coptic texts:

- a richly-annotated database using ANNIS database technology
- TEI-XML versions of the texts for download
- Visualizations (including diplomatic editions) in HTML and inside the database

Tools for digitally processing texts in Coptic

Documentation

A platform where scholars and students will able to contribute texts and/or annotations and conduct research

Completely open source & open access

Texts

Proof-of-concept corpora:
Shenoute, Abraham Our Father (Canons vol. 3)
Select Coptic Apophthegmata Patrum

They contain:

- Diplomatic & normalized editions
- Translation
- Annotation

All of this is available online

http://go.pacific.edu/copticscriptorium

Tools: Encoding Converters

What you give: ASCII

- Basic LaserCoptic or CMCL ASCII font
- 2) Exhaustive "Coptic" font (by G. Wurst & D. Van Damme)

What you get: UTF-8

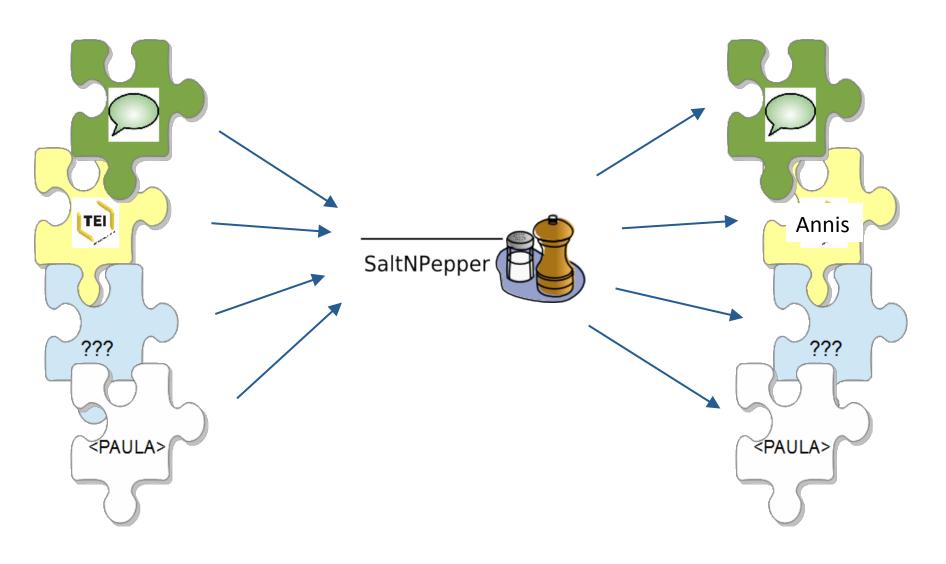

Fully compliant Unicode Coptic

etbe néeere de éhm ntansvtm etbhhtoy

итансшти етвинтоү

File Format Converter (SaltNPepper)

Tokenization Scripts & Lexicon

Scripts process files of Coptic text to break the words into morphs

Based on CMCL Lexicon provided by T. Orlandi

Tokenization scheme follows morphemes established in B. Layton's grammar

Tokenization Script

What you give:

text as words

хүхоос етве апа папноүте же нечеспи есенрії . ευμοσώς με πουσεία) αυεί εχπ ουκολλυκίου πλυστής додиля отап гай эд Рифусора . Фору в тот пето пандод AYOU EUCOOYN XE HEUCE HPTT AUNAY EPOU 2TH OYNOG TRUCE αμιούς πουαποτ πήρπ έρε τευςήμε επ τευσία αυσ πεχλή πηρίλο με εκτήσω τηλροτβέκ . ληείμε ποι τρίλο με εγογαία εείρε πογπτολή πτε πλογτέ εγογαία етрну інноч ачхіті ачсооч . панхож де інхустис αμήθτανοι θύχαι πήμος χε και ναι έβολ παθίαυτ χε aitrice hak . πέχαν ναν νόι πεχλό χε tπίστεγε επνούτε με αναείρε νακ νούνα ετθε πειαπότ νήρπ επ пеішну ній петнну . педач нач іюі пархилистис де †πιστέγε επνούτε με αιν τένου π†ναρ πέθοου αν πλαλύ . πρίλο δε αυχπο ναυ ντκολλύσε τηρό σε λΥΚΩ ΝΌΟΥ ΗΠΕΥΟΥΦΟΙ ΕΤΒΕ ΠΝΟΥΤΕ .

What you get:

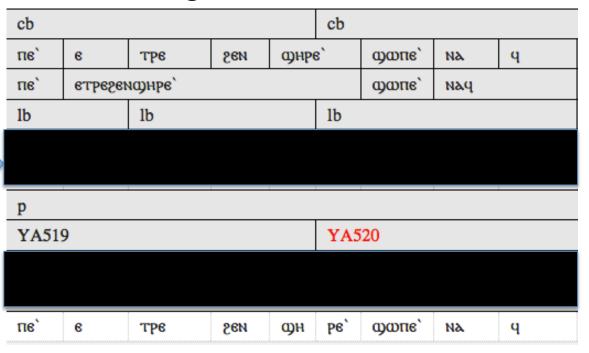

morphemes ready for tagging

ayx000	à						
	Y						
	X00						
	С						
етве	етве						
λΠλ	λΠλ						
папноүте	папноүте						
xe	x,€						
нечоепн	не						
	q						
	бепн						
есенрп	е						
	ce						
	нрп						
ечноофе	е						
	q						
	ноофе						
A.e	∆€						

Tokenization Script

Give: formatted diplomatic text

Get: morphemes for tagging Page, column, line breaks, word breaks aligned

Part of Speech Tagger

Give: tokenized text

Get: POS-tagged text, following Layton

Π

ноутє

ПЄ

.

Π ΝΟΥΤЄ ΠЄ ART
N
COP
PUNCT

Coarse grained tagger: 22 tags

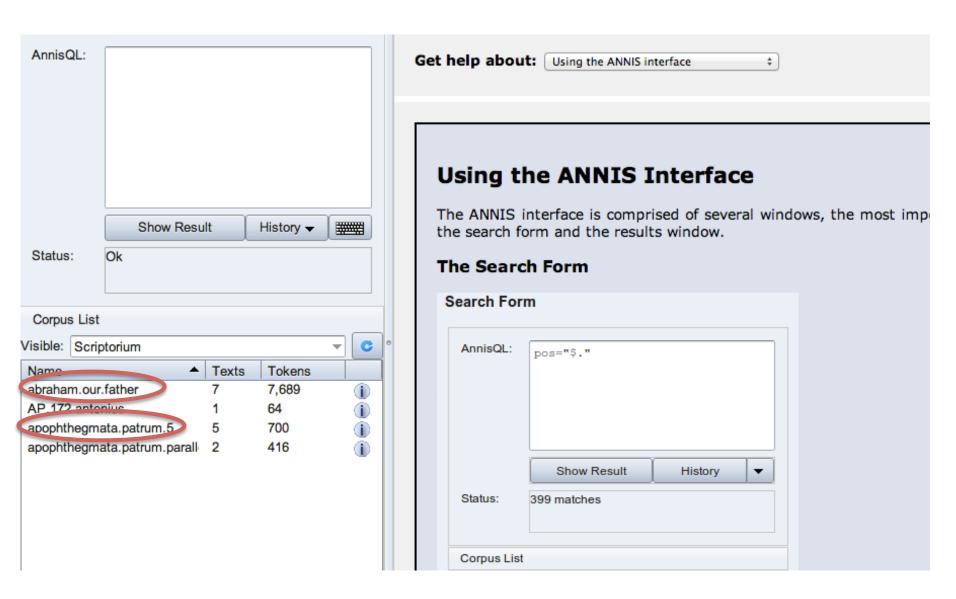

Fine grained tagger: 44 tags

All of these layers feed into the ANNIS database

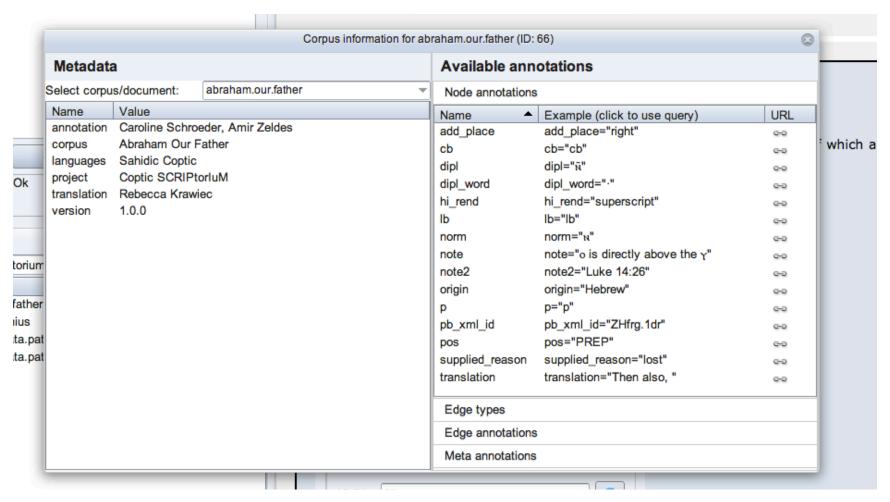

Open source (Apache 2.0)

Developed here at the Institute for German Language and Linguistics / SFB632

ANNIS & Search

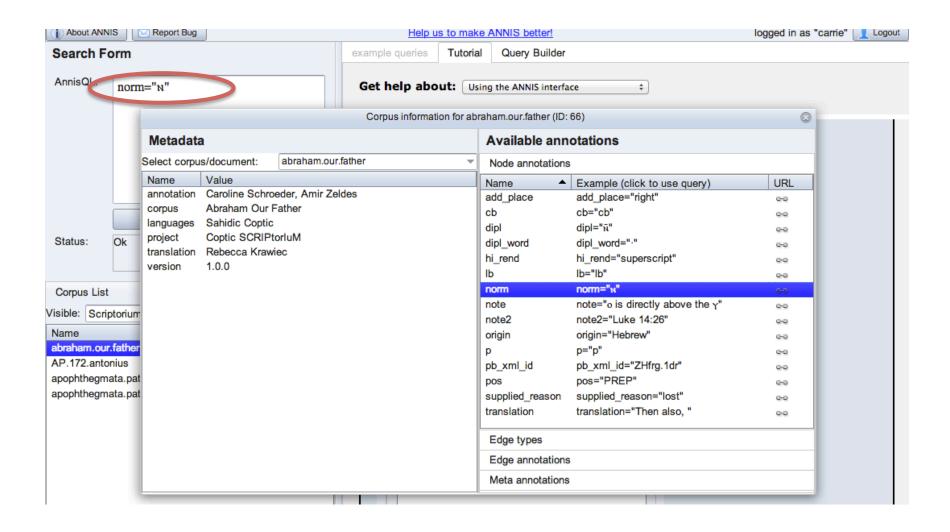

Corpus Information

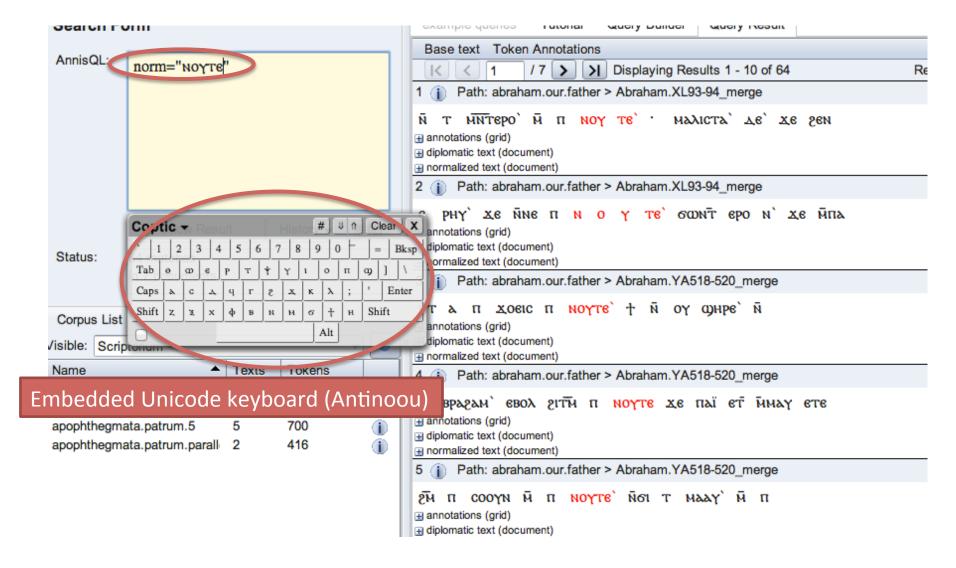

Nodes = the layers or fields of available information, e.g. words, line breaks in manuscripts, normalized tex.

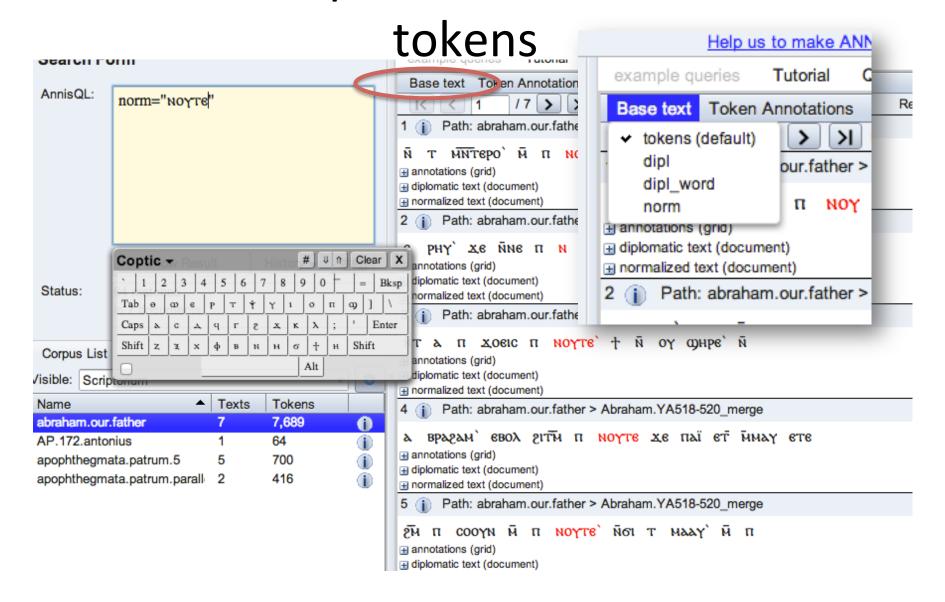

Example queries

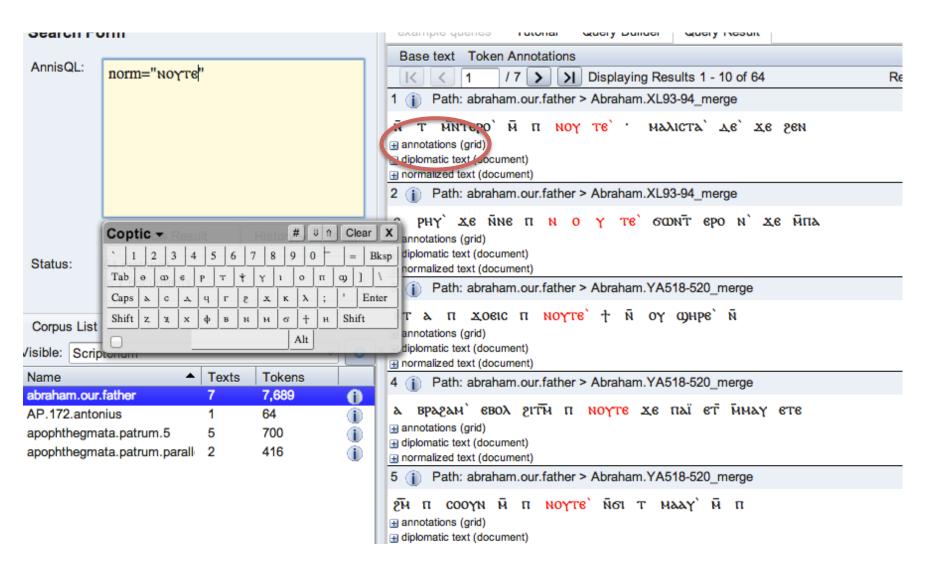

Edited previous query to search for Noγτε in the normalized text

Click on "Base text" to see search results as diplomatic, normalized, or

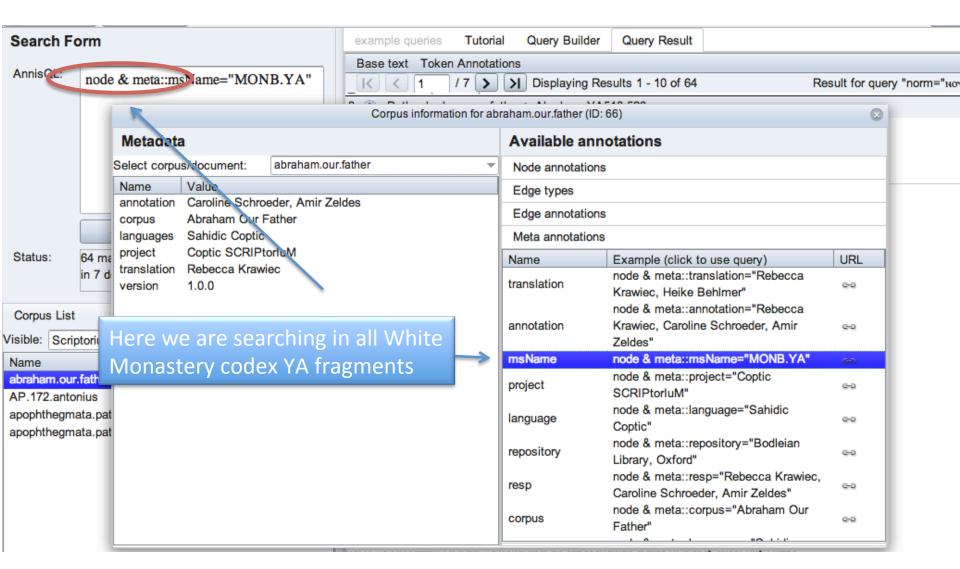

Click on "annotations grid" to see all the annotations of the text

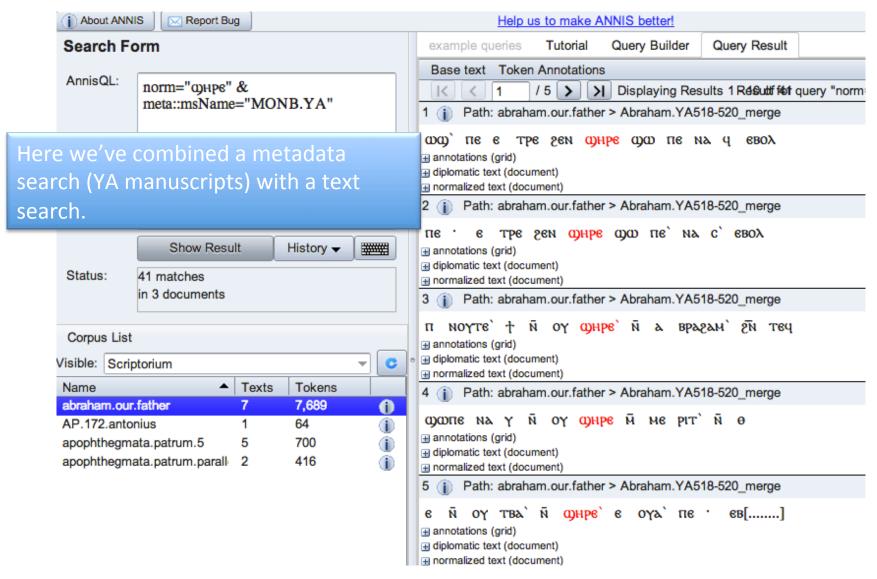

Grid of all annotations of text

3 i Path: a	/ 7 Displaying Results 1 - 10 of 64 Result for query "norm="νογτε" abraham.our.father > Abraham.YA518-520_merge

Papnoute: referenced by name, the old man, "my father"

We also have the HTML visualizations you saw online

Wait, there's more...

Download TEI (Text Encoding Initiative) XML compatible (text and metadata)

Files validate to EpiDoc TEI schemas to ensure interoperability

Open Source & Open Access

Texts and Tools:

- Freely available
- Can be modified
- Attribution to sources required (cc-by)

Long term goals

Expand corpus (with collaborators)
Improve existing taggers and tokenizer
Expand tools:

- Named entity recognition
- Language of origin (Greek, Latin, Hebrew...)
- Lemmatizer

Collaborative platform

- Text contributions
- Annotation layers

What we want from you

Texts

Feedback: what do you want from a database?

Feedback: what visualizations do you want?

Feedback: comments on tools

Funding & Support has been provided by:

- A grant from the Pacific Fund, the University of the Pacific
- A grant from the Faculty Research Council, the University of the Pacific
- The Department of Religious and Classical Studies, The University of the Pacific
- The Institute for German Language and Linguistics, Humboldt University
- C. Schroeder and A. Zeldes gratefully acknowledge the following individuals and organizations for their contributions to the project:
- The Corpus dei Manoscritti Copti Letterari (Coptic lexicon and other materials)
- Eric E. Johnson, Tibco Software
- Rebecca S. Krawiec, Ph.D., Canisius College (Abraham Our Father annotations and English translation)
- Tito Orlandi, Ph.D., Sapienza University, Rome; the University of Hamburg
- Janet Timbie, Ph.D., Catholic University of America (Apophthegmata Patrum annotations)
- The ANNIS team at Humboldt University
- Alex Dickerson, the University of the Pacific, student
